📍 India

SUMMARY

I am a seasoned performance testing manager with a solid background in developing and executing testing strategies for SaaS platforms. I have a proven ability to enhance system stability and improve team collaboration through innovative solutions and strong leadership. My passion for technology drives me to continuously optimize processes and seek new ways to solve complex challenges.

EXPERIENCE

Manager, Performance Testing

BOLD

📅 05/2024 - Current 📍 India

Performance testing services for SaaS platforms

- Designed and executed performance testing strategies for SaaS platforms, reducing critical defects by 35% and ensuring 100% compliance with industry and regulatory standards
- Developed and deployed an AI-powered Performance Assistant, accelerating root cause analysis and enabling stakeholders to make data-driven testing decisions 50% faster
- Optimized automated testing frameworks and CI/CD pipelines with Jenkins and Bitbucket, decreasing regression cycle times by 40% and supporting rapid, reliable software releases

Performance Engineer/QA Lead

BOLD

📅 08/2016 - 04/2024 📍 India

Performance testing services for SaaS platforms

- Engineered reusable automation frameworks that accelerated test execution by 40%, enabling consistent functional and non-functional coverage across multiple product lines
- Orchestrated cross-functional collaboration between DevOps and QA teams, streamlining CI/CD integration and reducing deployment-related defects by 35%
- Designed and implemented comprehensive performance testing strategies for mission-critical applications, identifying and resolving bottlenecks to achieve 99.9% system uptime and sub-second response times under peak loads

Software Engineer

MISYS SOFTWARE SOLUTIONS

📅 04/2013 - 07/2016 📍 India

Banking software solutions

- Designed and executed performance tests for the BankFusion banking platform, simulating over 5,000 concurrent users to identify and resolve scalability bottlenecks, resulting in a 35% improvement.
- Collaborated with cross-functional teams to analyze test results and implement optimizations, leading to a 25% decrease in critical production incidents post-deployment.

LANGUAGES

Hindi

English

STRENGTHS

Performance Testing and Team Leadership

Strong skills in project management and team collaboration, with experience in performance testing and automation

KEY ACHIEVEMENTS

AI-Powered Performance Assistant Development

Developed an AI-powered Performance Assistant that improved testing decision-making efficiency by 50%

SKILLS

Project Management

Performance Testing

Team Building

Automated Testing

Azure

GitHub

Jenkins

New Relic

Team Leadership
